

Fork Solar Panel

Overview

How much does Clear Fork solar cost?

Enbridge Inc. has taken a final investment decision (FID) to construct the Clear Fork Solar Project, a utility-scale solar power plant in San Antonio, Texas. The 600-megawatt (MW) facility will cost approximately \$900 million and come online in 2027. Enbridge is one of the largest solar developers in the USA.

What is Clear Fork solar?

Clear Fork will be a utility scale solar facility located near San Antonio, with 600 MW of capacity. Construction is underway, and the facility is expected to enter in service during the summer of 2027. Meta Platforms, Inc., has signed a long-term contract for 100% of the renewable output of the project.

What is Clear Fork Project?

One of the typical features of Clear Fork project is its long-term power purchase agreement (PPA) with Meta Platforms Inc. The social and tech company will be buying 100% of the power generated from the solar farm, which will be used to power its regional data center.

Will Enbridge build a 600 MW Clear Fork solar project?

Enbridge has committed \$900 million to develop the 600 MW Clear Fork Solar Project in Texas, which will supply power to Meta's data center.

Where should a large-scale solar PV installation be located?

Areas nearby that would be most suitable for large-scale solar PV installations include open fields, meadows, and rooftops of commercial buildings. These areas typically have unobstructed access to direct sunlight and are often situated in rural or suburban locations away from urban centers.

Where is a good location for solar power generation?

Nuremberg, Bavaria, Germany, situated at a latitude of 49.4521018 and longitude of 11.0766654, is a favorable location for solar power generation due to its position in the Northern Temperate Zone.
