

# **French charging market station energy storage project bidding**

## Overview

---

Pursuant to Article L. 352-1-1 of the Energy Code, the Decree provides for a transparent and non-discriminatory bidding process. The key elements of this process are as follows: 1. Drafting of the tender specifications will involve all the stakeholders. The Decree provides that RTE is responsible for.

The increasing share of renewable energies in the energy mix of EU Member States has led the European Commission and EU Member States to reconsider their.

The regulatory framework in place provides the Minister and RTE with important latitude to determine which technologies could be eligible for tenders. However.

How are public charging stations developed in France?

Previously, the development of publicly available charging stations has been through the French Environment and Energy Management Agency ("ADEME")'s now defunct programme " Investing for the Future " (" Programme d'Investissements d'Avenir" – PIA).

What percentage of France's charging stations are open to the public?

In 2019, local authorities directly initiated 70% of France's charging stations opened to the public. Most of these deployments (94%) received financial support under the Investments for the Future Programme (PIA) and were heterogeneous in size, ranging from only few charging points to several hundreds.

What is charge France?

Charge France marks a new milestone in addressing the electrification needs of households and businesses. In response to the challenges of the energy transition and the growing adoption of electric vehicles, Charge France aims to become a key interlocutor for public authorities and an accelerator for deploying ultra-fast charging infrastructure.

How much will charge France invest in infrastructure?

Charge France has announced an additional €3 billion investment by its members over the next three years, contingent upon regulatory stability in France and Europe allowing long-term investments in high-quality infrastructure.

Who is involved in charging stations for electric vehicles in France?

Though the French market is becoming more structured, there is still a rather large range of stakeholders operating in the development, of charging stations for electric vehicle: energy producers, energy providers, car manufacturers, parking operators, major players in the construction field and investment funds, as well as public authorities.

How much will France invest in public charging infrastructure by 2028?

These companies, which have already invested over €1 billion in developing public charging infrastructure—positioning France as a leader in the field—are now collectively committing to invest an additional €3 billion by 2028. Charge France marks a new milestone in addressing the electrification needs of households and businesses.
