

French solar systems in

Overview

Solar PV installations in France started being substantial only from around 2008. Between 2009 and 2011 PV capacity grew almost tenfold, from a relatively low level. In its 2014 report "Global Market Outlook for Photovoltaics", the European Photovoltaic Industry Association (EPIA) not only blames the French governm.

Solar power in France including overseas territories reached an installed capacity figure of 24.5 gigawatts (GW) at the end of 2023, up from 17.1 GW at the end of 2022 and just 11.2 GW in 2020. [1][2][3] The country currently has the eleventh-most solar capacity in the world and the fourth-most in Europe, behind Germany, Spain, and Italy.
