

Gaochi Hybrid Energy Storage Power Station

Overview

What is the first large-scale sodium-ion battery energy storage station in China?

In May 2024, Southern Grid commissioned a 10 MWh sodium-ion battery energy storage station in Nanning, Guangxi province, the first large-scale sodium-ion battery energy storage station in China. The energy storage station can store 100,000 kWh of electricity on a single charge, which can meet the needs of around 12,000 households for a day.

Where is baochi energy storage station located?

The Baochi energy storage station -- operated by China Southern Power Grid (Southern Grid) and located in Wenshan, Yunnan province in southwestern China -- can store up to 800,000 kWh of electricity per day, which can be used by 270,000 households, according to a Xinhua news agency report yesterday.

How big is the energy storage station?

The energy storage station covers an area of about 50 mu (33,333 square meters) and has more than 150 battery compartments and boost-converter compartments with a maximum instantaneous output capacity of 200 MW.

How many wind and photovoltaic plants can a battery storage station serve?

Utilizing better-performing sodium batteries, coupled with technologically mature lithium batteries and an output capacity of 200 MW, the storage station can serve more than 30 wind and photovoltaic plants and stations in Yunnan, Wang said.

How many kWh can a solar energy storage station store?

The energy storage station uses the latest high-capacity sodium-ion batteries with a top response speed six times faster than other existing sodium-ion batteries. It can store 800,000 kWh of electricity per day, which can be used by 270,000 households.

Gaochi Hybrid Energy Storage Power Station

Alba Renewables to Build Ilocos Norte's First Hybrid Clean Energy Plant

4 days ago· Planned as the first hybrid plant in the province, the facility will combine wind and solar generation with a battery energy storage system. It will harness the favorable natural ...
