

## Overview

---

What is the German solar battery storage price monitoring?

The German Solar Battery Storage Price Monitoring summarizes price data of the most important battery storage market segments. To that end, EuPD Research interviews 80 solar installation companies and summarizes developments in a price index. In addition, the following data is gathered in the German Solar Battery Storage Price Monitoring:.

Are solar photovoltaic modules safe in Germany?

In Germany, solar photovoltaic modules are certified according to European Norm (EN) standards. Manufacturers must comply with the "safety class II" norms that certify the electrical safety of photovoltaic modules.

How much does a photovoltaic module cost?

Mainstream Modules: Average price of €0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of €0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

What data is gathered in the German PV price monitoring?

The data stems from interviews with solar installation companies and an evaluation of offers made to end consumers on online portals. The following data is gathered in the German PV Price Monitoring: Split of turn key costs of < 30 kWp rooftop systems in different cost components.

How many PV modules are needed in Germany?

Annual installations of 12–20 GW are required for the construction and increasingly for the ongoing renewal of this plant park, corresponding to approx. 40 million PV modules at a cost of several billion euros. PV production in Germany offers long-term security of supply with high environmental,

social, and quality standards.

How much does a photovoltaic panel cost?

Mainstream Photovoltaic Panels: Average price of €0.10/Wp, down 9.1% month-on-month. Low-Cost Photovoltaic Modules: Average price of €0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.
