

# **Greek lithium-ion energy storage battery companies**

## Overview

---

Where are lithium ion batteries made?

There will also be further expansion of the assembly plants in Verona, Italy and North Carolina, United States. The €20m for lithium-ion batteries will also see an assembly line for prototyping and R&D purposes alongside the three production lines for off-road mobility, industrial use, and Energy Storage for renewables.

How much money does sunlight get for a lithium-ion battery project?

Image: SUNLIGHT. A €105 million (US\$127.6 million) push to develop low-cost, environmentally-friendly lithium-ion battery technology by Sunlight, a designer and manufacturer of batteries headquartered in Greece, will receive €49.9 million in grant funding.

What will sunlight's lithium battery technology be used for?

A company spokesperson told Energy-Storage.news today that Sunlight wants the lithium battery technologies it develops to play a key role in areas including automated guided vehicles, electric buses and shipping, as well as in “smart storage systems for renewable energy sources”.
