

# **Guyana Telecom Photovoltaic Base Station Installation Budget**

## Overview

---

Is Guyana a good place to install solar PV?

As a result, most locations across Guyana have excellent solar insolation levels and are ideal for solar PV generation. As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh.

How much solar energy is available in Guyana?

As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh. In Guyana, solar energy is used for several purposes, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas.

How many solar PV farms will Guyana have?

The main electric utility, Guyana Power and Light Inc. (GPL) is preparing plans for 3 utility scale solar PV farms totaling 30 MW for the national grid in the long term, as well as 0.75 MW Solar PV Farm at Wakenaam and a 4 MW Solar PV Farm at Onverwagt in the near future.

What is Guyana's main source of energy?

Guyana is currently dependent on imported petroleum-based fuels as its main source of energy.

## Guyana Telecom Photovoltaic Base Station Installation Budget

Solar

### The solar alternative for Guyana

Generation installation costs work out in US\$ per installed watt at \$5.45 for Amaila, \$3.60 for Gas-to-Energy, and \$2.50 for solar power (including 80% power factor compensation).
