

Heishan Island Solar Power Generation for Home Use

Overview

How will Hainan Haima's solar power project work?

The project will utilize the 31,300-square-meter roof area of the Hainan Haima Automobile Co., Ltd. assembly plant to generate a planned capacity of 4.6 MW through photovoltaic cells. Once the factory's energy needs have been met, surplus power will be sold back to the grid.

Does Hainan have a smart grid?

After more than 30 years of development, Hainan's power grid has undergone striking changes. The island has stepped into its role as a comprehensive smart grid demonstration province. In 2023, while maintaining a balanced power supply, its power load hit a record high for the 11th time in a row.

What is Qinghai-Henan high-voltage direct current power supply grid?

In December, the Qinghai-Henan high-voltage direct current power supply grid went into operation. The project spans more than 1,000 kilometers to send a steady stream of clean energy from Qinghai to Henan. Environmental benefits
The clean energy projects not only reduce pollution but also improve the environment.

How much energy will a solar power plant save a year?

Once the project reaches full production, it will be able to save 8.549 million kw/h of electricity every year, reduce the peak power load by 18,000 kilowatts (equivalent to the carbon sink capacity of 378.9 acres of forest), and bring down carbon emissions by 55,200 tons.

Heishan Island Solar Power Generation for Home Use

[Heishan Island, South Korea's most southwestern island](#)

Heishan Island is located in the southwesternmost Heishan Island in South Korea, about 93 kilometers away from the Korean city of Mokpo. Montenegro Island covers an area of ...

China starts producing power from 'world's largest open-sea' solar

Located 8 km offshore the city of Dongying, the solar farm covers some 1,223 hectares and comprises 2,934 solar PV panels installed using large-scale steel truss platform, ...

[Product Information](#)

LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring
No container design
flexible site layout

Cycle Life
≥8000

Nominal Energy
200kwh

IP Grade
IP55

[Hainan stepping into its role as a clean energy island](#)

After more than 30 years of development, Hainan's power grid has undergone striking changes. The island has stepped into its role as a comprehensive smart grid ...
