

# How much does a 2kw 24v inverter cost

48V 100Ah

## Overview

---

A solar inverter costs \$2,000 on average, with prices ranging from \$800 to \$5,000 —though the overall price is wrapped up in your solar panel installation. The size of your system, the type of inverter, and the efficiency rating affect your final cost. How much does a solar inverter cost?

You can expect to spend \$0.15 to 0.24 per watt on a solar inverter, excluding installation costs. Smaller inverters for DIY systems cost less than \$500, while large inverters can cost more than \$3,000. Use a solar panel inverter size calculator to determine the right size for your system. There are three main types of solar inverters for your home.

How much does a 2 kW solar system cost?

As of January 2022, the average cost of solar in the U.S. is \$2.77 per watt (\$5,540 for a 2-kilowatt system). That means the total 2 kW solar system cost would be \$4,100 after the federal solar tax credit discount (not factoring in any additional state rebates and incentives).

Can a 2KW solar system save you money?

Investing in a 2kW solar system can lead to significant savings on electricity bills. On average, this system can save up to \$621 per year. Over the 25-year lifetime of the solar panels, the total savings can amount to \$15,513. It is important to consider the rising cost of electricity when evaluating the potential savings of a 2kW solar system.

How much does a string inverter cost?

String inverters cost \$800 to \$2,500 on average. Most homes only require a single inverter, but you could need up to three if you have a larger-than-average residential solar energy system. String inverters work by connecting several solar panels, which send their electricity to a central point where the inverter converts the power.

How much electricity does a 2 kW solar system use?

The cost of electricity where you live is the most significant determinant of your solar savings. The table below shows average estimated electricity production numbers for 2 kW solar energy systems in cities across the U.S. By comparison, the average household in the U.S. uses 893 kilowatt-hours (kWh) a month, which equals 10,715 kWh per year.

How do I get the best deal on a 2 kW solar system?

Now that you know what to expect, you can ensure that you get the best deal on a 2 kW solar energy system by registering your property on the EnergySage Solar Marketplace. Use the comprehensive, easy-to-understand comparison tables to evaluate your equipment options, financing offers, and solar company reviews.
