

How much does a 5 kilowatt solar power station cost

Overview

On average, a 5 kW solar panel system costs \$13,550, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. How much does a 5 kW solar system cost?

A 5 kW solar panel system costs \$13,550 in 2025 before incentives. A 5 kW solar panel system produces about 7,260 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. The federal solar tax credit ends December 31, 2025—homeowners have only until the end of this year to secure 30% savings.

How much do solar panels cost per kWh?

This typically ranges from 6-8 cents per kWh, compared to current grid electricity averaging 16.44 cents per kWh nationally. Most homes need between 7-12 kilowatts (kW) of solar capacity to offset their electricity usage. A typical American household consuming 10,632 kWh annually requires approximately 8-9 kW of solar panels.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's “cost per watt” is a little like the “price per square foot” when you buy a house. It helps compare the value of solar energy systems in different sizes.

How many solar panels does a 5 kW solar system need?

Since most panels have a capacity of 300 watts, you would need 17 or more panels to achieve a total output of 5kW. If you need different power requirements, check out 4.5 kW solar systems How Big is a 5 kW Solar System?

.

What is a 5 kW solar system?

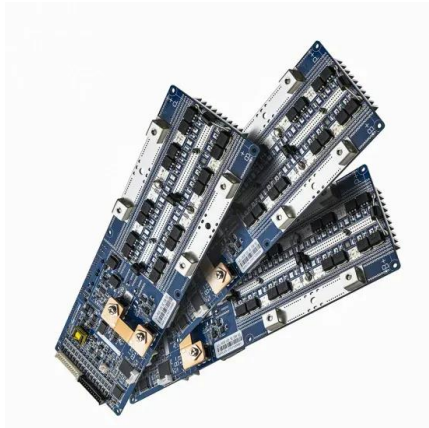

These 5 kW size grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans and instructions. These are complete PV solar power systems that can work for a home or business, with just about everything you need to get the system up and running quickly.

How much does solar power cost in 2025?

Take control of your energy costs with solar power. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.
