

# **How much does a 5G base station cost in China Communications**

## Overview

---

How much does a 5G base station cost?

[Click Here To Download It For Free!](#) Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

How many 5G base stations were built in 2022?

In 2022, Chinese telcos and China Tower built approximately 887,000 5G base stations, at an infrastructure cost of over RMB 180 billion (USD 26 billion), accounting for 43% of the fixed asset investment that year . As these companies are state-owned in nature, their culture and organisational setup make them responsive to political objectives.

How many 5G base stations does China have?

As of the end of 2022, China had a total of 10.8 million base stations, including 2.3 million 5G base stations, accounting for 60% of the world's total 5G base stations . It's estimated that China's per capita base station number is about 4 times that of the United States and 2.3 times that of the European Union .

How much does 5G infrastructure cost?

The total cost of 5G infrastructure is staggering, with projections estimating that telecom companies will spend over \$2 trillion globally by 2030. This includes investments in spectrum, network densification, fiber backhaul, energy-efficient infrastructure, and emerging technologies such as AI and automation.

How many 5G phone subscriptions are there in China?

China's 5G mobile phone subscriptions surpassed 1 billion by the end of November, local press reported, citing data released by the Ministry of Industry and Information Technology. The 5G subscriptions now represent

56% of all mobile lines in China, reflecting a 9.4 percentage point increase compared to the previous year.

How much does it cost to build a 5G network?

Fiber optic networks are the backbone of 5G infrastructure, providing the high-speed data transfer needed to support ultra-fast connectivity. However, laying fiber is expensive, with costs ranging from \$25,000 to \$100,000 per kilometer, depending on location, terrain, and construction regulations.

## How much does a 5G base station cost in China Communications

### [Ambitious 5G base station plan for 2025](#)

China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the ...
