

# **How much does energy storage power cost in Costa Rica**

## Overview

---

The study results indicate a total BESS capacity of 688 MWh / 100 MW for Costa Rica, with an estimated investment cost of approximately USD 63.29 M by 2024 and a Levelized Cost of Electricity (LCOE) of 53.04 USD/MWh. How much electricity does Costa Rica use per year?

of electric energy per year. Per capita this is an average of 1,904 kWh. Costa Rica could be self-sufficient with domestically produced energy. The total production of all electric energy producing facilities is eleven bn kWh, which is 110 percent of the country's own usage. Despite this, Costa Rica trades energy with foreign countries.

Where does Costa Rica's energy come from?

Most of Costa Rica's energy comes from renewable sources. More than 99 percent of the energy in Costa Rica was generated from renewable sources in 2019. According to the country's National Center for Energy Control, Costa Rica has been running on more than 98 percent renewable energy since 2014.

What is the main source of electricity in Costa Rica?

Hydroelectric power is the most used source in Costa Rica, providing about 78% of the country's electricity. Thanks to its many rivers and high rainfall, hydroelectric plants are mostly found in the central and southern parts of the country. Wind energy is the second major source, making up about 10% of the power supply.

Is solar energy a viable option in Costa Rica?

The government is encouraging more solar power use through various incentives. Geothermal energy, which uses heat from the earth, supplies about 10% of the energy. This type of energy is especially viable in Costa Rica because of its volcanic areas, with plants near volcanoes like Miravalles and Rincon de la Vieja.

Is Costa Rica a sustainable country?

Costa Rica has long been celebrated for its dedication to sustainable energy, and as we move through 2025, this commitment remains the same. You might wonder why a small country's approach to energy is significant on a larger scale.

What ecological services can be provided in Costa Rica?

The ecological services that can be provided include clean water, irrigation, energy production, biodiversity and scenic beauty. This allows for landowners, especially farmers, to earn an extra income even during unprofitable seasons. Costa Rica is producing so much energy that it can be sold.
