

How to access Jamaica communication base station EMS

Overview

What emergency services are in Jamaica?

The emergency services in Jamaica include the Jamaica Constabulary Force, the Jamaica Fire Brigade, and in the case of a hurricane or other natural disasters, the Office of Disaster Preparedness and .

Why is communication important in EMS?

Communication in EMS is essential. Patients must be able to access the system, the system must be able to dispatch units, EMTs must have a means of communicating with medical direction and receiving facility, and EMTs must be able to communicate vital information to other personnel.

How does EMS rebroadcast a radio signal?

Some rebroadcast by converting signals to radio and others do so by converting to microwaves. It may also convert the signal to a telephone signal and send the communications through public or dedicated telephone lines. EMS radio communication takes place in the VHF low band, VHF high band, and UHF band.

How can I receive items using EMS?

To receive items using EMS, you will need: 1 – A valid Government issued ID Card (Voters' ID or Drivers' License or Passport).

How do I call for help in Jamaica?

HOW DO I CALL FOR HELP?

As reported by the Jamaican Fire Brigade, the official national emergency number for the fire department is 110. However, the fire department also makes clear on their website that each fire station and ambulance service also has a unique, individual number.

What frequency does EMS radio communication take place in?

EMS radio communication takes place in the VHF low band, VHF high band, and UHF band. VHF low band is the radio frequencies from 32-50 megahertz (MHz). They are able to follow the shape of the earth allowing communication over long distances. These frequencies are more susceptible to interference from, weather, buildings, and electrical equipment.
