

Huawei 3012 base station power supply

Overview

What is the hardware structure and components of Huawei bts3012 Base Transceiver Station?

This document provides an overview of the hardware structure and components of the Huawei BTS3012 base transceiver station. It describes the main subsystems including the common subsystem with boards like the DTMU, DEMU, DCSU, DCCU, and DATU. It also outlines the cabinet top access subsystem with components such as the DMLC and DELC.

What power supply does the bts3012 use?

The BTS3012 uses the -48 V DC power supply. It supports the 110/220 V AC and +24 V DC power input through the Sidepower, which is the external power supply equipment. The installation of the BTS3012 has the following features: The BTS3012 supports installation against the wall. The BTS3012 supports combined cabinet installation.

What is Huawei bts3012?

The BTS3012 is a new member of Huawei GSM indoor macro-cell base station family. It has excellent performance and high reliability. It holds double transceivers. One BTS3012 cabinet can support a maximum of 12 TRXs. The BTS3012 can form a hybrid network with a BTS30 or BTS312.
