

Huawei New Zealand Energy Storage Project Company

Overview

Will Infratec build a new energy storage system in New Zealand?

Infratec general manager Nick Bibby said that the storage system is “the first of its scale to be built in New Zealand”. As reported by Energy-Storage.news, the two companies completed their assessment of the project in late 2021, selecting a site in Huntly, a town in the Waikato District.

What can New Zealand do to improve energy resilience?

WEL Networks and Infratec said they are actively pursuing other opportunities to enhance resilience and increase access to renewable energy in the region. New Zealand currently has a couple of 1MW battery storage systems in operation, but certainly nothing on the scale of the BESS in Huntly.

Is Meridian Energy building another megawatt project in New Zealand?

However, electricity generator and retailer Meridian Energy – owned by UK renewables utility Good Energy – is currently building another project almost three times as big in megawatt terms and of 2-hour duration, also on the North Island of New Zealand.

What are energy storage systems & how do they work?

Besides, energy storage systems (ESSs) can store electric energy during off-peak hours and discharge that energy during peak hours for peak shaving and load balancing, thus improving the operating efficiency and reliability of power grids while cutting power system investment.
