

Huawei inverters in the Central African Republic

Overview

Are Huawei solar inverters made in Australia?

Although the Huawei solar inverters deployed into testing were US models, it can be reasonably assumed that the models sold in Australia adopt the same or similar technology. As many Huawei inverters are manufactured in China, this enables them to be sold at a cheaper price in comparison to European manufactured competitors. Indicative pricing.

Why should you buy a Huawei inverter?

Huawei's next generation products offer advanced technical specifications, elegant and functional design and smart features that give it a competitive edge. These inverters are set to lead the market in a highly contested space. Huawei also presented new residential products featuring several key features to unlock more potential.

Is Huawei a good choice for C&I smart PV?

For over a decade, Huawei has been at the forefront of C&I Smart PV technology, continuously evolving its solutions to meet the growing needs of the industry. From its first-generation IP65-rated inverters in 2013 to the latest all-round C&I Smart PV solution launched today, Huawei has consistently pushed the boundaries of innovation.
