

# **Huawei s overseas solar panel factories**

## Overview

---

Which country produces the most solar panels in the world?

China is the world's biggest producer of solar panels and parts. (China Daily via Reuters) Solar is the fastest growing energy source in Europe, where capacity deployed in 2024 was higher than all other energy technologies combined, according to SolarPower Europe. Brussels' aim is to harness 600 GW of solar energy by 2030.

Does Huawei have a role in Europe?

Huawei declined to comment about its role in Europe. Brussels last year also launched a probe into uncompetitive practices by Chinese solar panel manufacturers, which resulted in two companies withdrawing their bids in a Romanian public tender last year. Workers in the autonomous region of Ningxia carry solar panels on their backs to a solar farm.

Will Chinese solar companies build factories in the US?

Since January of last year, at least eight Chinese brands — including industry majors Trina Solar and JA Solar — have announced plans to build factories in the U.S., according to the 2024 Global Solar PV Brand Influence Report handed out at the conference.

Are Chinese solar panels a threat to Europe's power infrastructure?

Awash with Chinese solar panels and parts made by companies such as Huawei Technologies, Europe is increasingly concerned about the safety of its power infrastructure, especially as its energy transition has led to the digitalization of the sector, making it vulnerable to remote attacks.

Why was Huawei expelled from Solarpower Europe?

The tech giant was expelled from SolarPower Europe on April 28 after the European Commission said it would restrict meetings with associations affiliated with Huawei. Several Huawei executives are being investigated --

some charged -- in Brussels for alleged corruption involving EU lawmakers.

Are Chinese solar companies going overseas?

Although Chinese solar firms have “gone overseas” for over a decade, the headwinds are stronger this time. They are facing internal and external worries simultaneously, as several company chiefs stressed, referring to domestic oversupply and international restrictions.
