

Hybrid energy storage power generation in Guinea-Bissau

Overview

Where will a solar power plant be built in Guinea Bissau?

The other small hybrid solar power plant will be built in the Gabu region in eastern Guinea Bissau. The plant equipped with a battery storage system and back-up generators (diesel), will also be capable of generating 1 MW. The solar hybrid plant will supply electricity to the local population via a medium and low-voltage line.

Will Sinohydro build a hybrid power plant in Guinea-Bissau?

The contract between Sinohydro and the State of Guinea-Bissau across the Abrec River also includes the construction of two hybrid power plants that will combine solar panels with diesel generators. A small plant will be built in Canchungo, a town of more than 7,000 inhabitants in the west of the country.

Will China build Guinea-Bissau's first solar power plant?

A Chinese state-owned company has been contracted to build Guinea-Bissau's first large scale photovoltaic project, the Gardete solar power plant. The African Biofuel and Renewable Energy Company (ABREC), which promotes renewables and energy efficiency in several countries, has awarded the contract to China's hydropower entity, Sinohydro.

Who financed the Guinea-Bissau solar project?

The entire solar and hybrid project is being financed by the Government of Guinea-Bissau with a \$42.9 million loan from the West African Development Bank (BOAD). This financing was granted as early as 2017. The solar project, for which Sinohydro signed the engineering, procurement and construction (EPC) contract, involves three facilities.

How much energy does Guinea-Bissau use?

As a result, around 95% of the energy consumed in Guinea-Bissauan households comes from biomass. The AfDB recently stated Guinea-Bissau has

only 11MW of installed power generation capacity, almost all of being thermal generation.

Does Guinea-Bissau have solar power?

Guinea-Bissau relies on fossil fuels and solar has seen limited development, with the exception of rural electrification initiatives. The nation has one of the lowest electrification rates in Africa, as well as electricity prices among the highest on the continent.

Hybrid energy storage power generation in Guinea-Bissau

Guinea-Bissau's electrical planning to provide access to ...

The aim of this article is to present an energy plan for Guinea-Bissau based on the OMVG transmission network in the country and the integration of a photovoltaic plant at the Bissau ...
