

# **Iceland Lead Carbon Energy Storage Power Generation Project**

## Overview

---

Project Silverstone an innovative EU-funded project run by ON Power and Carbfix, will deploy full-scale CO<sub>2</sub> capture, injection, and mineral storage at the Hellisheiði ON Power plant, reaching worlds first near-zero carbon footprint geothermal power plant. Why should we use renewable fuel in Iceland?

Usage for our renewable fuel in Iceland will secure our place as a leader in Iceland's Energy Transition. In addition, Carbon Iceland will also provide renewable fuels for export, directly to large offtakers in Europe and US.

What can carbon Iceland do for the maritime industry?

This will allow transportation industries to take giant steps, phasing out fossil fuels and converting to renewable fuels, without completely replacing engines of current fleet. Carbon Iceland is proud to collaborate with some of the largest fishing fleet operators in Iceland, providing them with renewable fuel for the maritime industry.

How does carbon Iceland use CO<sub>2</sub>?

At later stages, Carbon Iceland has planned a diverse portfolio of different CO<sub>2</sub> sources, including DAC. By mixing CO<sub>2</sub> with hydrogen, on a large capacity, Carbon Iceland is able to produce renewable fuels for engines that currently use fossil fuels.

Can carbon Iceland replace fossil fuels?

By mixing CO<sub>2</sub> with hydrogen, on a large capacity, Carbon Iceland is able to produce renewable fuels for engines that currently use fossil fuels. This will allow transportation industries to take giant steps, phasing out fossil fuels and converting to renewable fuels, without completely replacing engines of current fleet.

What happens at the end of the Iceland experience?

At the end of the Iceland experience, students will walk away with a stronger

understanding of the science behind this geoengineering strategy, how it could be expanded, and how it could be a disruptive technology that allows us to address current carbon dioxide challenges in the Earth's atmosphere.

## Iceland Lead Carbon Energy Storage Power Generation Project
