

# **Indian imported home energy storage**

## Overview

---

Which energy storage system is most popular in India?

Solar photovoltaic (PV) and battery energy storage systems (PV + BESS) comprised 90.6% of the total installed capacity. “India is an emerging market for energy storage, still in the early stages of development.

How big is India's battery energy storage system?

India’s total Battery Energy Storage System (BESS) capacity reached 219.1 MWh as of March 2024, according to Mercom India Research’s newly released report, India’s Energy Storage Landscape.

How will energy storage for solar power users develop in India?

To summarize, here are a few ways the market for energy storage for solar power users will develop in India in the future: Hybrid solutions with solar, storage, and smart inverters will rule. IoT and AI powered energy management will reduce power usage.

Is India a good market for energy storage?

“India is an emerging market for energy storage, still in the early stages of development. Despite rapid growth in renewable energy, energy storage has lagged, which could potentially lead to curtailment and a lack of grid flexibility and stability. The urgency seen in renewable energy initiatives has been missing in energy storage.

What is India's energy storage policy?

India’s policy landscape for energy storage is evolving rapidly. The government has introduced hybrid renewable and storage policies, along with increased budget allocations for solar projects, including \$1.1 billion for grid-connected solar and funds for rooftop solar.

Why is battery energy storage a key part of India's strategy?

A key part of our strategy is advancing battery energy storage system (BESS) integration into upcoming solar and hybrid projects. As India moves toward its 500 GW non fossil fuel based targets, enhancing dispatchability and grid stability will be critical.
