

Ireland Mobile Power Station BESS

Overview

Where is ESB launching a Bess battery?

It follows the launch of ESB's first BESS sites, a 19-MW/38-MWh facility, also in Aghada, in 2022, and of a 75-MW/150-MWh battery at ESB's Poolbeg Energy Hub in Dublin earlier this year.

How will a battery-based energy storage system affect energy security in Ireland?

In addition, by participating in the capacity market, the project will have a positive impact on energy security in Ireland. This battery-based energy storage system is designed to provide 20MW for up to four hours. Most grid-scale batteries currently deployed in Ireland range from 30 minutes to two hours of energy storage capacity.

Where is a 20MW Bess project located?

The 20MW BESS, supplied by global market leader in utility-scale energy storage solutions and services, Fluence, will be co-located with Statkraft's 55.8MW Cushaling Wind Farm. The wind project is currently under construction.

How many MW does Bess have?

While total BESS operational capacity on the island was around 21 MW just over a year ago, these new projects bring the total capacity to 156 MW, and this number is expected to more than triple within the next 12 months as the industry goes from strength to strength. The projects include

Ireland Mobile Power Station BESS

[Approval for battery energy storage system in north Mayo](#)

PLANNING approval has issued for a 80MW/160MWh Battery Energy Storage System (BESS) in north Mayo, capable of powering over 75,000 homes for up to two hours at ...
