

Is Norway s energy storage battery industry an industry

Overview

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. “There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It’s the key to turning intermittent wind and solar into a stable energy source,” explains Pål Runde, Head of Battery Norway.

How big is Norway's battery market?

batteries for stationary energy storage - a market expected to reach EUR 57 billion by 2030. Now, a more mature Norwegian battery industry has greater potential to accelerate the renewable energy transition in Europe. Today Norway has not one, but two huge battery markets.

Why is battery technology important in Norway?

Battery technology is essential to meet Europe and Norway’s zero emission targets by 2050, helping to reduce carbon emissions in the energy and transport sectors across the continent. In Norway, strong battery research communities have flourished for over a decade, attracting growing interest from the industry.

Why is the battery value chain important in Norway?

arket share in several parts of the battery value chain. The battery value chain has the potential to become a major new, profitable industry in Norway, giving us a chance to contribute to emission reduction, create green jobs and aid the transit.

What is Norway's battery strategy?

from fossil to renewable energy in Norway and abroad. The battery strategy forms part of the Government’s Green Industrial Initiative, and the value chain or batteries is one of seven pillars in this initiative. The others are the value

chains for offshore wind, hydrogen, carbon capture and storage (CCS).

Why is Norway a world leader in batteries for transportation?

Within application of batteries for transportation, the majority of the research in Norway has been related to the maritime industry. This has given Norway a world leading position in this field. Corvus Energy is one of the pioneers in energy storage and delivers zero-emission solutions for all segments in the maritime transportation.
