

Is it necessary to buy an outdoor power supply when going to Sao Tome and Principe

Overview

Do I need a travel adapter in Sao Tome & Principe?

The electrical outlets and power plugs in Sao Tome and Principe are of types C & F (see images). If your country uses the same electrical outlets and power plugs, you don't need a travel adapter. However, you may still need a voltage converter if the voltage is different.

What type of plugs fit in Sao Tome & Principe?

Also known as the Schuko plug. Plugs of type C and E will also fit in a type F socket. If you're not sure whether the outlets and plugs used in your country are the same as in Sao Tome and Principe, you can use the tool at the top of this page to check if you need a travel adapter.

What is the standard power socket voltage in Sao Tome & Principe?

All power sockets in Sao Tome and Principe provide a standard voltage of 220V with a standard frequency of 50Hz. You can use all your equipment in Sao Tome and Principe if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia.

Do I need a voltage converter in Sao Tome & Principe?

The voltage used in Sao Tome and Principe is 220V and the frequency is 50Hz. If this is the same in your own country, you don't need a voltage converter when travelling to Sao Tome and Principe. If the voltage and/or frequency in your country is different, you should check if your devices are dual voltage.

Does a laptop charger work in Sao Tome & Principe?

In Sao Tome and Principe, the standard voltage is 220V and the standard frequency is 50Hz. Most laptop chargers are designed to be compatible with a range of voltages (dual voltage), so they should work with outlets in Sao Tome and Principe without any issues.

How much electricity does Sao Tome & Principe produce a year?

Sao Tome and Principe's First National Communication submitted to UNFCCC in December 2004 estimated that the hydropower could theoretically provide 247 GWh of electricity per year, 70% of which could be tapped to annually produce 170 GWh. However, electricity generation from hydropower provided only 6 GWh in 2013.
