

Is the battery charged when packing

Overview

No, battery packs typically do not arrive fully charged. Most manufacturers ship them with a partial charge for safety and longevity reasons. Many devices are designed to maintain battery health by preventing deep discharges before shipping. How much Mah does a battery pack charge?

In our tests, 10,000mAh of battery pack capacity translated to roughly 5,800mAh of device charge. 20,000mAh chargers delivered around 11,250mAh to a device, and 25,000mAh banks translated to about 16,200mAh of charge. That's an average efficiency rate of around 60 percent.

How do I choose the best portable battery charger?

For a portable battery charger, the Anker PowerCore+ Mini is a great choice. It is slightly larger than a tube of lipstick in size, making it easy to slip into a pocket for on-the-go charging. Look for the DWYM seal for products that are the best in the category.

How many charges can a battery give a smartphone?

Most manufacturers list how many charges a battery can give a certain smartphone. In our tests, 10,000mAh of battery pack capacity translated to roughly 5,800mAh of device charge. 20,000mAh chargers delivered around 11,250mAh to a device, and 25,000mAh banks translated to about 16,200mAh of charge.
