

# **Kazakhstan s photovoltaic module export tariffs**

## Overview

---

How much solar energy does Kazakhstan use a year?

Solar energy can be widely used in two-thirds of the territory of the Republic of Kazakhstan. In the southern regions, the duration of solar radiation is from 2,800 to 3,000 hours per year, and the annual consumption of solar energy is from 1,280 to 1,870 kWh per 1 m<sup>2</sup>.

How many solar power plants will Kazakhstan have in 2020?

According to the Strategic development plan of the Republic of Kazakhstan and the Concept of transition to a “green economy” it is planned to put into operation about 28 solar power plants by the end of 2020. Biomass.

Is Kazakhstan transitioning from fossil-based to low-carbon energy?

The Republic of Kazakhstan has embarked on the energy transition from the fossil-based to low carbon power. Coal is the dominant source of energy in the country, accounting for 64.7% of total projected generation and 74.0% of thermal generation in 2019.

Does Kazakhstan have a tariff policy?

Under its WTO commitments, Kazakhstan agreed to gradually lower 3,512 tariff rates to an average of 6.1 percent by 2020. In January 2016, the country began applying lower-than-Common External Tariff rates to certain food products, automobiles, airplanes, railway wagons, lumber, alcoholic beverages, pharmaceuticals, freezers, and jewelry.

How much electricity did Kazakhstan produce in January 2019?

Overall, power plants of Kazakhstan in January 2019 produced 9 944.4 million kWh of electricity. In January 2019, compared to the same period of 2018, electricity production increased significantly (growth of 20% and above) in the Turkestan region.

How many power plants are there in Kazakhstan?

Up to the present moment, the country has 72 active renewable energy facilities with a total capacity of 634 MW – 200.25 MW hydroelectric power plants, 249 MW solar power stations, 183.25 MW wind power stations and 1.65 MW biogas facility. Overall, power plants of Kazakhstan in January 2019 produced 9 944.4 million kWh of electricity.
