

# Korea Telecom BESS Power Station Specifications

## Overview

---

What is battery energy storage system (BESS)?

Battery Energy Storage System (BESS) Integrated Storage Solution The BESS can provide services to all areas of solution for on-grid.

What are BESS specifications?

These specifications determine performance, efficiency, lifespan, and overall suitability for your energy needs. This guide breaks down the key BESS specifications you should analyze before purchasing a system to ensure optimal performance and long-term reliability.

What is BESS ion & energy and assets monitoring?

ion – and energy and assets monitoring – for a utility-scale battery energy storage system (BESS). It is intended to be used together with additional relevant documents provided in this package. The main goal is to support BESS system designers by showing an example design.

How long can a 2 MW / 4 MWh BESS deliver?

A 2 MW / 4 MWh BESS can continuously deliver 2 MW for 2 hours before it runs empty. A 1 MW / 4 MWh BESS can deliver 1 MW for 4 hours with the same energy storage. Key Consideration: Ensure your system's power rating matches your peak demand while energy capacity meets your storage duration needs. 2. Depth of Discharge (DoD).

Will KEPCO tender a BESS project in 2022?

According to a June 2022 report by Electronic Times (ET News), an information technology media outlet based in South Korea, KEPCO announced its plan to tender contracts to build the five BESS installations, selecting bidders by October of that year.

How many companies are involved in the BESS project?

In total, 14 companies were involved, including HD Hyundai Electric, Hyosung Heavy Industries, LS Electric, Samsung SDI, LG Energy Solution, and others. HD Hyundai Electric announced the completion and start of operation of its 336MW BESS for the utility a couple of months ago.
