

# Kyrgyzstan Environmental Protection Energy Storage Project

- ✓ 100KW/174KWh
- ✓ Parallel up-to 3sets
- ✓ IP Grade 54
- ✓ EMS AND BMS

## Overview

---

How much does Kyrgyz energy project cost?

The project has a multi-phase programmatic approach with a financing envelope of \$125.7 million over 10 years. The first phase of the project will focus on supporting the Kyrgyz Republic to increase hydropower generation and enable renewable energy integration by strengthening the country's transmission systems.

How can I export data from Kyrgyzstan?

Data will be available through the .Stat Data Explorer, which also allows users to export data in Excel and CSV formats. Kyrgyzstan has considerable untapped renewable energy potential. Existing renewable energy consists of large HPPs, which account for 30% of total energy supply, but only 10% of hydropower potential has been developed.

What laws regulate environmental protection in Kyrgyzstan?

The Law on Environmental Protection, the Law on Ecological Expertise and the Law on Common Technical Regulations to Ensure Environmental Security form the legislative backbone for environmental protection in Kyrgyzstan. They regulate environmental impact assessments and the process of environmental appraisal.

How much CO2 does Kyrgyzstan produce?

higher than the global average. The Kyrgyzstan energy sector contributes to roughly 60%, 9.1 MT of CO<sub>2</sub>, of its total GHG emissions, where the residential energy consumption and the production of heat & electricity account for over 70.

When will the Phase 1 project be implemented in Kyrgyz Republic?

The Phase 1 project will be implemented during 2024-2028 by the Ministry of Energy of the Kyrgyz Republic, in compliance with strict international

standards including procurement and financial management regulations and anti-corruption guidelines.

Why is Kyrgyzstan's energy sector deteriorating?

in Kyrgyzstan. Deteriorating infrastructure The deterioration of energy sector infrastructure coupled with the financial crisis in the energy system will eventually lead either to a significant decrease in the quality of produ
