

Kyrgyzstan energy storage power station sells electricity through walls

Overview

How has Kyrgyzstan improved energy statistics data collection?

Kyrgyzstan has achieved great progress in strengthening energy statistics data collection through the INOGATE programme: the National Statistical Committee has submitted joint annual questionnaires to the IEA since 2014, and for 2015 the breakdown of natural gas consumption by sector had improved.

Is Kyrgyzstan part of Central Asian power system?

Kyrgyzstan is part of the Central Asian Power System connecting Uzbekistan, Kyrgyzstan, Tajikistan and Kazakhstan. New integration plans include the Central Asia-South Asia power project (CASA-1000), which will connect the electricity-exporting countries of Kyrgyzstan and Tajikistan with Afghanistan and Pakistan to supply them with electricity.

Who has power in Kyrgyzstan?

Executive power in Kyrgyzstan lies with the government, its subordinate ministries, state committees, administrative agencies and local administrations. In the energy sector, the government: Grants and transfers property rights, and rights for use of water, minerals and other energy resources.

Does Kyrgyzstan depend on hydroelectric plants?

The sector's heavy dependence on hydroelectric plants is reflected in domestic power production levels, with hydropower typically representing around 90% of Kyrgyzstan's annual power output during normal hydrological periods. The figure below shows current generating capacity and recent trends in power production in Kyrgyzstan.

Why is JSC national energy holding important in Kyrgyzstan?

Accordingly, it has a pivotal role in maintaining electricity reliability and

ensuring power system security within Kyrgyzstan. Recent changes to institutional arrangements, in particular the creation of JSC National Energy Holding, have served to consolidate public management and control of the Kyrgyz power sector.

What is Kyrgyzstan's energy saving potential?

Kyrgyzstan's energy saving potential is significant: it is estimated that rehabilitation and modernisation can save up to 25% of electricity and 15% of heat.
