

Kyrgyzstan introduces new energy storage policy

Overview

What is Kyrgyz energy policy?

Outlook to the Kyrgyz energy policy To unleash the RE capacity, the Kyrgyz government introduced the law titled “Renewable energy sources (RES)” in December 2008 (Ministry of justice of the Kyrgyz Republic, 2008). Kyrgyzstan was the first country in Central Asia who implement RE-based law.

Why is energy policy important in Kyrgyzstan?

The current energy policy is considered as one of the key barriers to the developing the renewable energy sector in Kyrgyzstan. Hence, there is an immediate need to evaluate the formulated energy policy to investigate gaps and uncertainties.

Does Kyrgyzstan need heating?

Because of the country's geographical features, the energy need for domestic space heating is a key priority as compared to the energy need for lighting and cooking in Kyrgyzstan (IEA, 2020). Due to the long and harsh winter (-25 to -30°C in the mountainous areas), heating is a primary need for local people.

What are the objects of regulation in Kyrgyz Republic?

According to the law, objects of regulation are: “production, consumption, and sale of heat, electric energy and fuel using renewable energy sources, as well as the production and supply of equipment and technologies in the field of renewable energy source” (Ministry of justice of the Kyrgyz Republic, 2008).

Does Kyrgyzstan have a good power supply?

According to the results of the quality of energy delivering services survey in Kyrgyzstan made by the National Statistical Committee in 2015, “only 11.8 % of households had uninterrupted power supply, while 64.4 % had power cut several times a year and 0.5 % had daily power cuts” (National Statistical

Committee of the Kyrgyz Republic, 2017).

Are untapped re sources a solution to energy issues in Kyrgyzstan?

It is also mentioned that the untapped RE sources are the solution to resolve the energy issues of Kyrgyzstan. However, the recent theoretical development identified that the current energy policy is considered as one of the key barriers for the development the RE sector in Kyrgyzstan.

Kyrgyzstan introduces new energy storage policy

[RENEWABLE ENERGY SOURCES IN KYRGYZSTAN](#)

As part of the support of green initiatives, a study was conducted jointly with the International Renewable Energy Agency (IRENA) to assess the readiness of the Kyrgyz Republic for ...

[Product Information](#)

Peak kyrgyzstan energy storage

Formulate an energy research, development and innovation (RDI) strategy, including the setting of clear priorities within thematic areas and applied research, to ensure that priorities are ...
