

**Life 20A
12.8V-7Ah**

WW-127
 Cycle Weight And Low Self-Discharge Battery

Nominal Voltage: 12.8V
 Nominal Capacity: 7Ah
 Self-Discharge: 10%/mo
 Charge Current: 0.1C (700mA)
 Charge Voltage: 14.4V (25°C)
 50 cycles (100% DoD)
 500 cycles (50% DoD)
 Operating Temperature: Charge 0°C to 45°C
 Discharge: -20°C to 55°C

CAUTION!
 Do not Short Circuit
 Do Not Crush
 Do Not Heat or Expose to Fire
 Do Not Inhale or Any Liquid
 Do Not Overcharge
 Only Use Recommended Charge
 Avoid 100% Capacity
 Recycle properly & Reuse

Made in China

Lithium-Ion Phosphate Recycleable Deep Cycle Battery

Overview

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is.

SEIA does not guarantee that every identified project will be built. Like any other industry, market conditions may impact project economics and timelines. SEIA will remove a project if it is publicly announced that it has been canceled. SEIA actively.

What is the major solar projects list?

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

How is the list of solar projects gathered?

The information in the list was gathered from public announcements of solar projects in the form of company press releases, news releases, and, in some cases, conversations with individual developers. It is not a comprehensive list of all utility-scale projects under development.

How many solar projects are there?

There are more than 7,950 major solar projects currently in the database, representing over 340 GWdc of capacity. There are over 1,200 major energy storage projects currently in the database, representing more than 89,000 MWh of capacity. The list shows that there are more than 180 GWdc of major solar projects currently operating.

What are some examples of solar agriculture projects?

Solar agriculture TotalEnergies has several examples of solar agriculture projects in its portfolio. For the Camelicious solar project, TotalEnergies installed solar panels on a camel farm in the United Arab Emirates to power 80% of the farm's electricity needs — making it the world's first solar-powered dairy farm.

How much will solar projects cost in 2023?

Construction will commence in 2024 and is expected to be completed in 2025, costing \$280 million. FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

How much does a solar project cost?

The project site covers about 10,000 acres of land, mainly pasture and cropland. The project is expected to start construction in 2024 and enter commercial operation in the first quarter of 2025. According to the 2022 Annual Technology Baseline (ATB), solar with co-located energy projects will cost \$1,540/kW.
