

Lesotho substation curtain wall photovoltaic

Overview

Does Lesotho have a solar farm?

This is especially so for countries like Lesotho that have abundant sun throughout the year. LSP Construction constructed the first ever Solar Farm in Lesotho in the Mafeteng District at Ha-Ramarethole. The project will help Lesotho optimise its energy structure by cultivating solar power expertise to improve the economy and Basotho's livelihoods.

Should Lesotho invest in solar energy?

Erection of a new 55 km 132kV overhead transmission line from Ha-Ramarothole to Ha-Mofoka. Solar energy is increasingly one of the most sought-after forms of energy in developed countries. But that already is a problem because developing countries like Lesotho, have over the years shown little appetite to invest in solar energy.

What is LSP construction doing in Lesotho?

LSP Construction constructed the first ever Solar Farm in Lesotho in the Mafeteng District at Ha-Ramarethole. Two Phases, Phase I - 30MWp and Phase II - 40MWp. Phase I currently in progress: Expansion of the Ha-Ramarothole substation. Erection of a new 55 km 132kV overhead transmission line from Ha-Ramarothole to Ha-Mofoka.

What is photovoltaic curtain wall?

Photovoltaic Curtain Wall generates energy in the building implementing solar control by filtering effect, avoiding infrared and UV irradiation to the interior.

When did construction of ramarothole substation start?

Civil works at Ramarothole substation began in August 2021 with excavations, site leveling and backfilling. Construction of foundation of main transformer was completed in October. Furthermore, construction of foundation of distribution room and complex building are at an advance stage (70%

complete).
