

# **Lithium battery energy storage price quotation**

## Overview

---

Are lithium-ion batteries suitable for stationary energy storage?

Lithium-ion batteries (LIBs) are popular energy storage system due to their high energy density. However, the uneven distribution of lithium resource and increasing manufacturing cost restrain the development of LIBs for a large-scale stationary energy storage application , , .

What happened to lithium-ion battery energy storage systems in November 2024?

In November 2024, the lithium-ion battery energy storage system quotation and winning bid price hit new lows again. The quotation range of lithium-ion battery energy storage systems was 0.398 - 1.395 yuan/Wh, with an average quotation of 0.56 yuan/Wh, a 16.4% decrease compared to October.

What is a lithium battery energy storage system?

Lithium batteries have a broad prospect in applying large-scale energy storage systems due to their characteristics of high energy density, high conversion efficiency and rapid response. The new power system generation will widely use the technology of lithium battery energy storage in the future.

How big is the lithium-ion battery storage market?

The Lithium-ion Stationary Battery Storage Market was valued at USD 33 billion in 2021 and is projected to expand at over 21% Compound Annual Growth Rate (CAGR) from 2022 to 2032. The market size is expected to grow due to the rising emphasis on mitigating greenhouse gas emissions.

How much does a 1MWh battery energy storage system cost?

For a 1MWh battery energy storage system, Energetech Solar offers a system with a price of \$438,000 per unit for a 500V - 800V system designed for peak shaving applications. There are also quantity discounts available, with the price dropping to \$434,350 for purchases of 3 - 9 units and to \$431,000 for

purchases of 10 or more units.

How has the lithium-ion battery price changed in 2024?

Current Market Prices According to recent data from BloombergNEF, in 2024, the global lithium-ion battery prices have seen a significant decline. The cell price has dropped by 30% to \$78/kWh, equivalent to approximately 0.56 yuan/Wh in Chinese currency, while the battery pack price has decreased by 20% to \$115/kWh, or 0.805 yuan/Wh.
