

Lithium battery pack charging in winter

Overview

Lithium batteries can perform in cold weather, as long as temperatures stay above subzero levels. Charging them below 25° F can cause long-term damage. To maintain battery health and performance, avoid charging in freezing conditions.

Lithium battery pack charging in winter

Voltage ranges 91.2-947.2V
>6000 cycles(100%DOD)
Rated battery capacity:
216KWH (customizable)
EMS communication:
4G/CAN/RS485

[Do Lithium Batteries Hold Up In Cold Weather? Tips For ...](#)

To maintain battery health and performance, avoid charging in freezing conditions. Knowing these limits helps ensure optimal use of your lithium battery. To optimize ...
