

Lithium battery prices in the Belgian market

Overview

How much does a lithium battery cost in Belgium?

The average lithium battery import price stood at \$36,194 per ton in 2021, increasing by 6.2% against the previous year. This report provides an in-depth analysis of the lithium battery market in Belgium.

How big is the battery market in Belgium?

The battery market in Belgium is expected to reach a projected revenue of US\$ 1,494.7 million by 2030. A compound annual growth rate of 25% is expected of Belgium battery market from 2024 to 2030. The Belgium battery market generated a revenue of USD 313.1 million in 2023 and is expected to reach USD 1,494.7 million by 2030.

What is the growth rate of Belgium battery market in 2023?

The Belgium battery market generated a revenue of USD 313.1 million in 2023 and is expected to reach USD 1,494.7 million by 2030. The Belgium market is expected to grow at a CAGR of 25% from 2024 to 2030. In terms of segment, lithium ion was the largest revenue generating product in 2023.

Which country imports lithium batteries from Belgium?

In value terms, Poland constituted the largest supplier of lithium cells and batteries to Belgium, comprising 49% of total imports. The second position in the ranking was taken by Israel, with a 14% share of total imports. It was followed by China, with a 12% share. What are the leading importers of lithium cells and batteries from Belgium?

.

What is the value of the global lithium-ion battery market?

The global lithium-ion battery market reached a value of US\$ 34.1 Billion in 2020. Looking forward, the global lithium-ion battery market to exhibit strong

growth during the next five years. A lithium-ion battery (LIB) is a rechargeable battery that utilizes an intercalated lithium compound as its electrode.

What happened to the Belgian lithium battery market in 2021?

In 2021, after three years of growth, there was significant decline in the Belgian lithium battery market, when its value decreased by -28.9% to \$X. Over the period under review, consumption, however, showed significant growth. As a result, consumption reached the peak level of \$X, and then declined remarkably in the following year.
