

Lithium battery string voltage

Overview

A lithium-ion battery has a nominal voltage of 3.7 volts per cell. When connected in series, the total voltage increases by 3.7 volts for each cell. This configuration allows for different battery pack designs.

Lithium battery string voltage

[Ultimate Guide to Lithium-Ion Battery Voltage Chart](#)

Different voltage sizes of lithium-ion batteries are available, such as 12V, 24V, and 48V. The lithium-ion battery voltage chart lets you determine the discharge chart for each ...
