

Mauritania Solar Home Power System

Overview

How many solar panels does Mauritania produce a year?

The facility is responsible for 10% of Mauritania's grid capacity. It generates 25,409 megawatt-hours of renewable electricity per year and displaces approximately 21,225 tons of CO2. The plant's almost 30,000 solar panels, manufactured by Masdar PV, provide electricity to more than 10,000 houses in Nouakchott.

How does Mauritania get its electricity?

The last 24% is insured by the electricity importation coming from Manantaly hydro power plant based in Mali. In 2011, electricity production stood at 136 megawatts (MW) in Mauritania and was 100% from thermo power. Mauritania aims to increase and diversify its energy sources.

What is Masdar doing in Mauritania?

The power plant is one of numerous worldwide initiatives supported by Masdar. Mauritanian utility (SOMELEC) issued a request for proposals, and the Vergnet-ABC Diesel pool was chosen to deliver the hybrid power plant project in Mauritania. It will be the first of its kind in the sub-region of West Africa.
