

Mauritius Energy Storage Management System

Overview

Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

Where can I find information on energy access in Mauritius?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Mauritius on the IEA homepage. Find relevant information for Mauritius on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

Is the energy strategy in Mauritius sustainable?

The energy strategies in Mauritius, which have been demand-driven without incentives to reduce demand, can no longer be sustainable. It is the duty and responsibility of the Government to work towards decreasing carbon dioxide emissions in light of environmental issues.

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

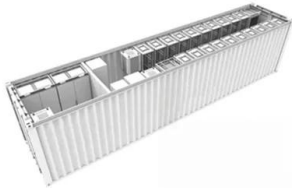

What is Mauritius aiming to reduce dependence on?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by, reducing the country's dependence on coal and heavy oil for electricity generation.

Mauritius Energy Storage Management System

[Mauritius Energy Storage Project Policy Document](#)

In line with the government's vision to promote renewable energy in the electricity mix to 60% by 2030, a 20 MW grid scale battery energy storage system (BESS), has been inaugurated in the ...

[Product Information](#)

[Mauritius energy minister inaugurates 20MW BESS](#)

The large-scale battery energy storage system (BESS), provided by German engineering company Siemens, was inaugurated on the morning of 28 May, with dignitaries in ...
