

# Mexico Solar Panel Project

## Overview

---

Currently, 98% of all distributed generation can be attributed to solar PV panels installed on rooftops or small businesses. This installed capacity has greatly increased from 3 kW in 2007 to 247.6 MW by the end of 2016. According to the Mexican Ministry of Energy ( ) if this trend continues till 2018 the total installed capacity will surpass 527 MW, this is the goal set by the Mexico's Special Program for Energy Transition or PETE (Programa Especial de la Transición).
