

# **Middle East Energy Storage Battery BESS Company**

## Overview

---

What is a battery energy storage system (BESS)?

Saudi Electricity Company (SEC) has taken a significant step in modernising the Kingdom's energy infrastructure with the awarding of contracts for a large-scale Battery Energy Storage System (BESS). The project, with a combined capacity of 2,500 MW/10,500 MWh, will enhance grid stability and support renewable energy integration.

Which is the largest energy storage project in the Middle East?

This facility stands as one of the largest energy storage projects in the Middle East and Africa. The Bisha BESS, owned by Saudi Electric Company , comprises 122 prefabricated storage units designed and supplied by China's BYD.

Why are batteries becoming a preferred energy storage solution in the Middle East?

In the Middle East and African region, the demand for batteries has increased in the Middle East as a preferred energy storage solution primarily due to technological innovation and the reduction of battery costs.

What is a Bess project?

The SPPC, administered by the Saudi Ministry of Energy, aligns with the National Renewable Energy Program (NREP). Once completed, the BESS project is expected to be the world's largest. Location: Saudi Arabia Capacity: 8GWh of storage capacity Significance: World's largest BESS Project Main Company Involved: Saudi Power Procurement Company.

What is battery energy storage system?

Energy storage is the technique of storing energy in specific equipment or systems so that it can be used when needed later. This enables businesses and sectors to save energy and use it when demand rises, or grid failures

occur. The Middle-East and Africa Battery Energy Storage System Market is segmented by Technology, Application, and Geography.

What is Eskom's first battery energy storage system?

December 2022: Eskom, South Africa's principal utility and grid operator, has begun work on its first battery energy storage system (BESS) with Hyosung Heavy Industries. It will generate 8MW of power and store 32MWh of energy, and it will be erected in 7-12 months with a connection to Eskom's Elandskop substation.
