

Mobile outdoor communication power supply BESS

Overview

What is Bess & apex Energy Monitoring portal?

Suitable for a wide range of mobile communications applications including off-grid, emergency backup power, energy stabilisation and frequency response. Designed to be 'plug and play', BESS ensures swift installation and provides peace of mind. Apex Energy monitoring portal helps customers to keep an eye on multiple systems from a single location.

Do mobile Bess applications have communication interfaces?

This thesis project, carried out at Northvolt Systems, aims to analyze the existing and readily used communication interfaces for a specific set of mobile BESS applications. The analysis is performed by a literature review of typical mobile BESS applications with the identified corresponding communication interfaces.

What applications can a mobile Bess support?

The project aims to perform a thorough analysis of the various communication interfaces applicable to the applications that a mobile BESS can help support, of which, some typical VMS applications are construction sites, festivals, and EV charging stations.

Which is a typical utility Bess use case?

Which is one of the most typical utility BESS use cases, providing setpoints through operator or automatic control as in ancillary services. The three mobile storage applications presented in this section were identified and chosen through some application criteria. The applications presented focuses mainly on industrial and utility cases.

How much power does a Bess have?

The system is built of two main blocks. The PCS building block, responsible for the main control of the mobile BESS. The nominal power rating of the PCS

block is 225 kVA, with a maximum peak power in the peak shaving mode of 275 kW . The second block is the modular battery pack.

Why should you choose a Bess energy storage system?

The mobility and flexibility of the system enables novel applications and deployments where BESS previously were unused due to the non-flexible solutions. The system is modular, meaning that the energy storage capacity can be quickly adapted depending on the application case, in contrast to larger and bulkier solutions.

Mobile outdoor communication power supply BESS

Mobile BESS: Reliable Temporary Power Solution for Data Centers

From charging equipment to bridging grid connection delays, ensure reliable power for data center construction & operations with mobile BESS.
