

# Morocco photovoltaic project energy storage ratio

## Overview

---

How much will Morocco's solar energy project cost?

In November 2009 Morocco announced a solar energy project worth \$9 billion which officials said will account for 38 percent of the North African country's installed power generation by 2020. Funding would be from a mix of private and state capital. The ceremony was attended by U.S. Secretary of State Hillary Clinton and the Moroccan king.

What is a solar PV project in Morocco?

The 'Solar PV project in Morocco' project aligns with the following UN Sustainable Development Goals: Ensure healthy lives and promote well-being for all at all ages. Ensure access to affordable, reliable, sustainable and modern energy. Promote inclusive and sustainable economic growth, employment and decent work for all.

How big is Morocco's photovoltaic capacity in 2023?

According to the latest data from ONEE cited in the report, Morocco's photovoltaic cumulative capacity reached 0.32 GW in 2023. Under SolarPower Europe's medium scenario projections, this capacity is expected to see "a steady increase, reaching 2.27 GW of cumulative installed capacity by 2027 and peaking at 2.97 GW in 2028."

Why should Morocco invest in solar energy?

With strategic investment in solar infrastructure, Morocco is poised to realise its full potential, accelerate its energy transition, and foster long-term sustainable growth." Morocco is committed to expanding its renewable energy capacity, aiming to reach at least a 52% share of its total electricity capacity by 2030.

What are some examples of large-scale solar development in Morocco?

A prime example of Morocco's large-scale solar development is the Noor

Ouarzazate complex, one of the world's largest concentrated solar power facilities, with 510 MW of installed capacity and an additional 72 MW for solar PV.

Will Morocco become Africa's solar energy pioneer?

Morocco's exceptional solar resources, reaching 2,264 kWh/m<sup>2</sup>/year in southern regions, position the country to become Africa's solar energy pioneer, new SolarPower Europe report reveals. Morocco's solar power capacity could surge from 0.32 GW to 4.35 GW by 2028.
