

Mozambique Washanan Solar Energy

Overview

Can Mozambique take full advantage of its solar potential?

In a new monthly column for **pv magazine**, SolarPower Europe describes how Mozambique may take full advantage of its huge solar potential by implementing its recently launched Renewable Energy Auctions Programme for large-scale projects, while also pushing for more off-grid renewables in remote areas.

Can Mozambique generate electricity from renewable resources?

The total potential for generating electricity from renewable resources is over 23,000GW, most of which comes from solar energy. The total electrification rate was about 40% in 2021. Mozambique's installed capacity stands at 2,905MW and is determined by the Cahora Bassa hydroelectric plant, which has an installed capacity of 2,075MW.

Is Mozambique a good place to invest in solar energy?

Mozambique has an abundant and unexploited solar resource which could be harnessed for utility scale as well as residential PV for both on/off grid electrification. The following map shows the global horizontal irradiation profile of Mozambique which varies between 1,785 and 2,206 kWh/m²/year.

Is a floating solar power project possible in Mozambique?

Mozambique public utility Electricidade de Moçambique intends to carry out a feasibility study into the potential development of a floating solar power project on the Chicamba dam (Manica province) as well as feasibility studies for battery energy storage systems BESS in ten sites in Mozambique.

How much energy will Mozambique generate a year?

The plant will increase Mozambique's installed capacity by 50% and generate 8.6 TWh per year, enough to power more than 3 million homes. A GREEN REVOLUTION: The country is also actively developing other renewable energy

segments, such as solar and wind, which together are expected to represent 20% of domestic energy production by 2040.

Will Mozambique get a solar power plant in 2023?

Future tenders are expected to be announced in Q4 of 2023, including the selection of two independent power producers for two 30 MW solar photovoltaic power plants and one 50 MW wind power plant. But Mozambique has an enormous challenge that spreads far beyond where the national grid ends.
