

Mozambique solar motor 220v 3kw

Overview

Does Mozambique need solar energy?

In the rapidly evolving world of renewable energy, Mozambique has emerged as a significant player, especially in the solar energy sector. With its abundant sunshine and increasing focus on sustainable development, the demand for solar energy systems in Mozambique has seen a considerable rise.

When did Globeleq & Mozambique launch a solar power plant?

Our solar power plant in Cuamba was inaugurated in September of 2023. It marked another milestone for Globeleq and Mozambique, as it was the first IPP to integrate a utility-scale energy storage system.

Who built Mozambique's first large-scale solar power plant?

Capital and expertise from Scatec Solar, KLP and Norfund enabled the construction of Mozambique's first large-scale solar power plant. Central Solar de Mocuba (CESOM) provides over 79 GWh of electricity annually, which is equivalent to the electricity consumption of more than 170,000 households in Mozambique.

What is central solar de Mocuba?

Central Solar de Mocuba has increased Mozambique's energy generation capacity by 40 MW and will produce approximately 79 GWh per year. The project's strategic location will reduce energy transmission losses and improve the security of energy supply in northern Mozambique and stabilize the grid.

Why is Mozambique a good place to invest in solar energy?

Firstly, Mozambique has a high solar irradiation level, making it an ideal location for harnessing solar energy. This abundant solar resource presents a sustainable and cost-effective solution for addressing the country's energy needs.

Where is Mozambique's power plant located?

The plant was built in the Zambezia Province in north-central Mozambique. Mozambique is one of the poorest countries in the world and access to electricity is extremely limited. In rural areas only 6 percent of the population has an electricity supply. National demand for electricity is growing significantly due to industrial and commercial growth.
