

New Zealand energy storage battery manufacturer wholesale

Overview

What is a battery energy storage system?

A battery energy storage system (BESS) is a technology that allows for the storage of electrical energy in batteries, which can then be used to power electrical loads. BESS can be used for a variety of applications, including grid stabilisation, load shifting, backup power, and integration with renewable energy sources such as solar and wind power.

How do I order a battery in New Zealand?

Order your battery from your desk and it will be delivered to your door - free to main centres in New Zealand. Be in complete control of the ordering process while you're 'one on one' with a battery specialist. Pay by Credit Card, Cheque or internet banking - your choice.

What are the different types of battery energy storage solutions?

Our fully integrated, plug-and-play battery energy storage solutions (also known as BESS) come in different sizes, from 30 kVA to 1MW, to suit a wide range of industrial and commercial energy storage applications. They ensure maximum system effectiveness and efficiency.
