

New energy storage cabinets in Arab countries

Overview

Planned to expand at least 15-fold within the next four years, the announced large-scale storage systems in Gulf Arab states are together expected to exceed 1.5GW of capacity by 2027, with 7.5GWh of cumulative stored energy deployed through several notable projects in Saudi Arabia and the United Arab Emirates (UAE). Does the UAE have energy storage systems in the GCC region?

The UAE has installed most of the energy storage systems in the GCC region. In 2016, Abu Dhabi Water & Electricity Authority announced the deployment of around 108 MW of sodium-sulfur-based BESS with an individual capacity of around 4 MW and 8 MW at different locations to support their distribution network.

Should Australia adopt battery energy storage systems?

Australia is adopting battery energy storage systems as a solution to these challenges where it has deployed around 700 MW BESS capacity and has plans to install over 5 GW capacity by 2030. The addition of the energy storage systems would help:.

How can governments support energy storage development in the GCC region?

The governments in the GCC region could collaborate with energy storage developers to introduce favorable regulations and provide capital investments to support the development of a utility-scale energy storage market and eliminate the financing risk and uncertainty factor for the projects by providing long-term contracts through auctions.

Why do we need energy storage systems in Australia?

The addition of the energy storage systems would help: Energy Time Shifting: As batteries help to shift the energy for use at a later time and hence Australia is installing it as a solution to store the overproduction of renewable energy during the day and use it at a later time when the demand is high.

Is battery energy storage a new technology?

The battery energy storage market has not experienced any significant growth in this region hence it is still seen as a new technology and the costs are relatively high compared to the parts of the world.
