

New foundation for powering telecommunication base stations in Saudi Arabia

Overview

How did STC contribute to the digitalization of KSA?

STC contributed to the deployment of 60,000 Wi-Fi hotspots through its collaboration with the Communications and Information Technology Commission (CITC) to serve public locations, for example, in hospitals, shopping malls and city parks, allowing users 2 hours of free access every day, to further boost digitalization in the KSA.

What are the electrical requirements for TS & FDS in Saudi Arabia?

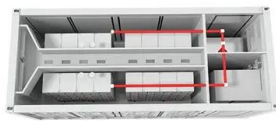

Each rack shall be provided in the TR and FDs in compliance with Saudi Electrical Code SB 401-CR. All metallic parts in the TS must be earth bonded with resistance of less than 1 ohm. An electrical 240V / 16A power outlet shall be made available collocated with each rack.

What is the Saudi Vision 2030 initiative?

When the Saudi Vision 2030 initiative was introduced in 2016, there was an increased governmental focus on reducing dependency on oil by diversifying the economy and developing public service sectors such as health, education, infrastructure, recreation and tourism. Several digital programs were administered under this initiative.

New foundation for powering telecommunication base stations in Saudi Arabia

[Al-Babtain Power & Telecommunication Co. Information](#)

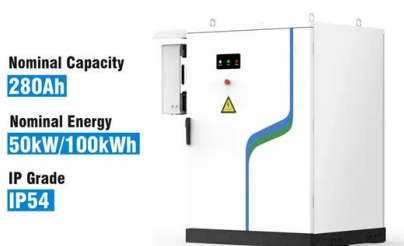

Founded in the year 1955- Saudi Arabia, Al-Babtain Power and Telecommunication Co- A Saudi Joint Stock company is one of the largest enterprises in the sector of engineering and ...
