

# Ningtie Energy Storage Battery

## Overview

---

Is Ningde the world's largest production base of polymer lithium-ion batteries?

The localization rate of main materials in the battery industry has reached more than 60 percent, enabling Ningde to become the world's largest production base of polymer lithium-ion batteries, the representative said.

Is Ningde the world's largest car battery maker?

It has remained the world's largest vehicle battery maker for six consecutive years. Propped up by CATL, Ningde introduced other leading players such as state-owned automaker SAIC Motor, which started production of its new vehicle assembly plant in 2019.

How many projects does Ningde have?

Led by these behemoths, Ningde has more than 80 projects over the battery-making industrial chain, and it has forged a comprehensive technology deployment ranging from raw materials, modules and battery management systems to battery recycling, a representative of Ningde's publicity department told the Global Times.

How did Ningde's new-energy sector perform in 2022?

In 2022, Ningde's lithium-ion new-energy sector achieved an output value of 275.8 billion yuan (\$40.7 billion), a jump of 74.6 percent from 2021, driving an increase of 20.3 percentage points in the industrial added value and becoming the city's first industrial cluster that exceeded 200 billion yuan in revenues.

## Ningtie Energy Storage Battery
