Overview

How is North Macedonia transforming its energy sector?

North Macedonia's energy sector is transitioning towards cleaner and more efficient solutions. While lignite remains a primary energy source, the country is significantly increasing investments in renewables, including: Hydropower – A well-established sector with untapped potential for small and large-scale projects.

What changes did North Macedonia make to its energy policy?

While there were no other major energy legislative changes, North Macedonia continues to harmonize its energy sub-regulations with the EU Energy Community's Third Energy Package (TEP).

Why did North Macedonia come out of the winter 2022 energy crisis?

North Macedonia came out of the winter-2022 energy crisis, driven in part by the war in Ukraine and lack of diversity in gas suppliers, with a better appreciation for the importance of resilience and redundancy in the energy sector.

What role does North Macedonia play in regional energy networks?

North Macedonia plays a crucial role in regional energy networks, with: Interconnections with Greece, Albania, Bulgaria, and Serbia – Strengthening energy security and market integration. Gasification Projects – Expanding natural gas infrastructure to reduce dependency on coal.

Does North Macedonia still have a coal power plant?

The smaller coal power plant, "REK Oslomej," which was dormant through 2020, was reactivated in 2021 to help North Macedonia reduce its reliance on electricity imports. ESM refurbished the "REK Bitola" coal power plant boilers in 2017, but its equipment is still largely outdated.

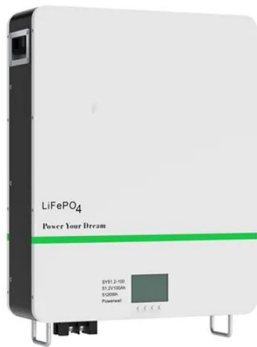

How many power plants are there in North Macedonia?

The electric power production system in North Macedonia consists of two coal power plants with a total installed capacity of 825 megawatts (MW), several hydro power plants with a total installed capacity of 695 MW, one combined generation power plant, a heavy oil plant, solar power plants, a few biogas plants, and two wind power farms.

North Macedonia containerized power generation sales

[The energy sector in North Macedonia](#)

North Macedonia relies predominantly on fossil fuels (low-grade lignite and gas) and hydropower, and has for many years been dependent on the electricity import. In 2023, imports finally ...
