

# Off-grid energy storage system connected to the grid

## Overview

---

What is the difference between off-grid & on- grid solar?

This distinction matters more than ever in 2025. Your choice depends on your energy needs, location, and budget. Off-grid systems provide energy independence, while On Grid Solar Systems ensure reliability through grid backup. By understanding these differences, you can make an informed decision that aligns with your goals.

Does SmartEnergy support off-grid homes?

SmartEnergy supports grid-tied and off-grid homes alike. Discover off-grid energy solutions with solar panels, battery storage, and hybrid setups to gain full energy independence and avoid outages.

What is an off-grid power conversion system (PCS)?

This allows the system to operate in isolation from the main grid, ensuring a reliable power supply. An off-grid Power Conversion System (PCS) is a crucial component of off-grid battery energy storage systems (BESS) that operate independently of the main power grid.

What is an off-grid power system?

Written by Austin Gray on June 27, 2025. Posted in Home How to power your home without relying on the grid Whether you're dreaming of remote living or just want more energy independence, off-grid power systems offer a compelling alternative to traditional utility electricity.

What is an off-grid Solar System?

An off-grid solar system runs separately from the main power grid. It is comprised of solar panels, a charge controller, energy-storage batteries, and occasionally a backup generator for unexpected situations. Off-grid systems are common in isolated locations where it is expensive or difficult to connect to the grid.

## What is an on grid Solar System?

An On Grid Solar System connects directly to the utility grid, allowing you to use solar energy while staying linked to the main power supply. This system ensures a seamless flow of electricity between your solar panels and the grid. When your solar panels produce more energy than you need, the excess electricity flows back into the grid.
