

Operation of new energy sites

Overview

Are Argonne & Oak Ridge a key site for new nuclear reactors?

By identifying key sites for new nuclear reactors, researchers at the U.S. Department of Energy's (DOE) Argonne and Oak Ridge national laboratories are helping to chart a path toward the U.S. clean energy future.

Do energy infrastructure projects need a siting & permitting process?

All energy infrastructure projects undergo some form of siting and permitting impacted by government regulations.

Why should you choose GE Energy for your O&M site?

GE Energy's O&M sites also benefit from our use of extensive remote monitoring and diagnostic equipment, as well as online tools such as PowerSmarts™, and EMAP+ to provide detailed analysis, reporting and predictive data on plant performance.

Operation of new energy sites

A smarter, faster way to explore, evaluate and execute new ...

Energy companies may consider many different sites at once when looking for new zones of operation. They will remotely plan where to go, how to get there and do an initial ...
